Database Gudang dan Penjualan

1. Tampilan pada AI (saya menggunakan Grok AI)

2. Tampilan pada localhost phpMyAdmin

The screenshot displays the phpMyAdmin web interface in a browser. The address bar shows the URL: `localhost/phpmyadmin/index.php?route=/database/structure&db=gudang_dan_penjualan`. The interface includes a top navigation bar with tabs for Structure, SQL, Search, Query, Export, Import, Operations, Privileges, Routines, Events, Triggers, Tracking, and Designer. On the left, a sidebar shows the database hierarchy with 'gudang_dan_penjualan' selected. The main content area shows the 'Structure' view for the selected database. It includes a 'Filters' section with a search box, a table listing existing tables, and a 'Create new table' form at the bottom.

Below the table list, there is a 'Check all' checkbox and a 'With selected:' dropdown menu. At the bottom, there is a 'Create new table' section with a 'Table name' input field, a 'Number of columns' input field (set to 4), and a 'Create' button.
